

## Shape the future of work with assono.

We are seeking enthusiastic individuals to help us achieve a higher level of success for our clients.

## Internship, thesis project or student job

### Division: Artificial Intelligence

As an internationally reputable IT consulting company in northern Germany, we are currently recruiting qualified and innovative people for our professional team at assono.

Using state-of-the-art methods and tools, we identify opportunities for improvement in our customers' business processes, develop sophisticated, bespoke IT solutions and offer customer support during operation. Our renowned client base includes SMEs and multinational corporations with core businesses in various industrial sectors. In their quest for innovative, efficient solutions for their ambitious projects, they require consultancy services of the highest level. Our clients expect comprehensive, up-to-date and professional expertise, as well as excellent customer support for their IT environment.

Would you like to contribute to solving our customers' technical problems within a highly-skilled team, learn from the best and have fun while doing so?

Then send your application to:

[bewerbung@assono.de](mailto:bewerbung@assono.de)

You will find more information here:

### What we expect of you?

- You are looking for interesting challenges and tasks in the field of AI either for your internship, thesis project or practical experience during your studies.
- You are excited about the opportunities that Artificial Intelligence offers today, and have a desire to learn how companies can profit from AI solutions.
- You ideally have some experience in application development and want to learn how AI solutions from major manufacturers can be used for individual solutions.
- You are extremely curious about current technologies and have a desire for further training on a professional level.
- You speak English fluently and are preferably a native speaker who likes to communicate in English at work.

We are looking forward to receiving applications from highly motivated, committed team players who are interested in innovative, high quality IT solutions and concepts.
